

Phocos South East Asia founded

Recently the Phocos group founded a new subsidiary in Asia. We are happy to introduce our new partners in Singapore.

Phocos SEA was founded to meet the growing demand for renewable energy products in the South East Asian region. Located in Singapore, Phocos SEA aims to serve customers with products of high cost-effectiveness and reliability. With the new office in Singapore we can provide improved support for our customers in South East Asia.

Current Projects

Solar technology classes in China

Since September 2003 we have been partnering with GTZ (association for technical co-operation) and the University of Applied Science in Ulm on an education project in China to strengthen the knowledge of solar technology in Chinese universities.

During this project, solar technology classes have been held in China. The first classes took place at the China Ocean University in Qingdao in February 2004. Later this project will be transferred to further universities in the west of China. Phocos contributes important support to this project.

International

Phocos AG has moved

At the beginning of March the Phocos AG has moved into a new office building which offers more space for both – engineering and administration. Our new address:

Phocos AG
Eberhard-Finckh-Strasse 10
89075 Ulm, Germany
Phone +49 (731) 940 20 88 - 0
Fax +49 (731) 940 20 88 – 6

Personal

Peter Zetzsche supports the team of Phocos Latin America in Bolivia since 01.03.2004. He has been appointed as Sales Manager and is an experienced partner for our customers in South America.

[Contact](#) ⓘ

Douglas Shelly has been appointed as our new Managing Director at Phocos China Ltd recently. He brings 14 years of management experience in a multinational corporation. His first ambitious project is increasing CML production, including the introduction of three semi-automatic testing and calibration stations to help us meet the strong demand for this product.

Short Notes

Phocos growth 2003 was exceptional

The Phocos group has completed a very successful year 2003. With a sales increase of nearly 70% we have exceeded our ambitious targets. The current incoming orders let us expect strong growth for 2004 again.

Exhibitions & Fairs

Recent Exhibitions

- Exhibition on Solar Energy in Thailand 2004, 27.01. to 01.02.2004
- Symposion Photovoltaische Solarenergie in Staffelstein, Germany, 10. to 12.03.2004
- Asia Renewable Energy Fairs - REAsia 2004 in Beijing, 07. to 09.04.2004

Upcoming Events

- European Photovoltaic Solar Energy Conference and Exhibition, Paris, 07. to 11.06.2004, stand no T5
- Intersolar 2004, Freiburg, 24. to 26.06.2004, stand no 3/390
