- Remote control
- Headphone jack

The TV 07 by Phocos can be used as a TV receiver and as a monitor for VHS/VCD/DVD players. It features a color TFT display screen with seven-inch screen diagonal. The device is directly operable in a 12-volt solar system. Due to the low

rate of energy consumption, it can also be used in very small solar systems. All of the major functions are adjustable via remote control.

Type	TV 07
