

Certificate No. 1015 / FhG-ISE / 001

Manufacturer: phocos China Ltd.

Charge regulator type: CIS MPPT 85/20

The above mentioned family of charge controllers have been subjected voluntarily to the qualification tests according to IEC 62 509 / 2010-12 Edition 1.0 "Battery Charge Controllers for Photovoltaic Systems – Performance and Functioning".

On the basis of the test results (CIS MPPT 85/20) that are laid down in the measurement protocol (test report) dated 22.05.2014 herewith we confirm that the tested charge controller type fulfils or exceeds controller specifications required by IEC 62 509 / 2010-12 Edition 1.0.

Remarks

1. This certificate is only valid in combination with above mentioned test report.
2. Any change in the electronic design, materials, components or processing of the CIS MPPT 85/20 charge controllers may require a repetition of some or all qualification tests to maintain type approval.

Ref. nr.: CIS201-phc-1405 / CIS202-phc-1405

Tests based on standard / requirements: IEC 62 509 / 2010-12 Ed. 1.0

General remarks, recommendations

The charge controller family CIS mppt of phocos AG are professional manufactured charge controllers. The performance in all areas (efficiency, protection features, self consumption etc.) is very high. The voltage thresholds are well adjusted. The charge controllers are protected against short circuit and reversed polarity PV module, short circuited and overload and reversed polarity battery using a reliable electronic fuse.

Test	Behaviour / results			
	DuT	2	p/f	remarks
Protection against short circuited PV ¹⁾	test ok	p		
Protection against reversed polarity PV Module	test ok	p		
Protection against transient overvoltage (diodes, varistors) ¹⁾			protection via varistor according to manufacturer	
Protection against short circuited load ¹⁾	test ok	p		
Operation with reversed polarity battery	test not ok	p ²⁾	the reverse voltage was fed to the load. The charge controller didn't suffer any damage.	

p/f: passed/failed

¹⁾ Not mandatory according to IEC 62 509²⁾ Manual clearly warns that load can be destroyed under those operating conditions --> pass

Remarks	the charge controller is protected against short circuited PV, reversed polarity PV Module, short circuited load, overload and reversed

Overview of measurement equipment used (following DIN ISO 9001:2000)

device	type	measured dimensions	reference number following DIN EN ISO 9001:2000
Agilent HP 34401A	Precision system-multimeter	voltages, currents up to 3 A	421-DC-10 421-DC- 11
Zimmer LMG 95	Precision-wattmeter	voltages, currents up to 20 A, power	421-DC-16 421-DC-25 421-LI-5
Tinsley 5885A	multi channel temperature measurement device	temperatures	421-DC-24
Temperature sensors	Pt 100	temperatures in conjunction with Tinsley 5885A	421-DC-24.1 421-DC-24.2
Agilent DSO-X 3014A	4-channel-digital oszilloscope	control of PWM behaviour	
Fluke 87	multimeter	voltage, current, resistor	421-DC-17 / 421-DC-18

Certificate DE07/3874

The management system of

Fraunhofer-Institut für
Solare Energiesysteme ISE

Heidenhofstraße 2
DE-79110 Freiburg

has been assessed and certified as meeting the requirements of

ISO 9001:2008

For the following activities

Research, development and service in the fields of thermal and electrical solar energy application, building services and hydrogen technology

Further clarifications regarding the scope of this certificate and the applicability of ISO 9001:2008 requirements may be obtained by consulting the organization

This certificate is valid from 30/04/2013 until 29/04/2016
Issue 5. Certified since March 2001
