Optimize your PV system with CISCOM

Phocos' innovative MPPT technology yields up to 30% more energy than PWM controllers. In addition, our signature **Power+**™ current limiter allows for oversizing PV power by up to 50% for winter months without damage in summer months.

The CIS-MPPT controllers are optimized to work with 60-cell modules. They ensure maximum performance and yield from all types of PV systems year-round and in any environment.

Phocos' CIS-MPPT controllers are equipped with 2 year datalogging memory.

Innovative Design

- Infrared-programmable load timing feature with dimming ideal for lighting systems
- 2-Year log of system performance data accessible via MXI-IR accessory, PC software (CISCOM)

Maximum Efficiency Charging

- Up to 98% power conversion efficiency
- 3-stage I/U curve sweep algorithm increases battery lifespan

Rugged Construction

- Anodized aluminum extrusion with built-in heat dissipation
- Fully encapsulated design prevents damage from corrosion, insects and/or dust.
